

THE MEASURE OF AMERICA

AMERICAN HUMAN DEVELOPMENT REPORT 2008–2009

Author Bios

Eduardo Borges Martins (Statistics Director): Eduardo has worked on measuring human development for over 16 years in Brazil and the U.S., with expertise in data analysis and manipulation of large databases of socio-economic indicators. He was a senior member of the team that created a Human Development Index for Brazil's over 5,000 municipalities, a project that won a United Nations award on "Excellence in the Innovative Use of Human Development Measurement Tools." As a result of this work, the Brazilian state of Minas Gerais has adopted the "Robin Hood Law"—a fundamental shift in the allocation of state revenues to reward sound social and environmental policies and investment. Beginning in the late 80's, Eduardo worked for the University of Illinois and the Federal Reserve Bank of Chicago designing statistical models for economic scenarios in several US Midwestern states, and subsequently with the U.S. Bureau of Census on manufacturing data. Eduardo holds a Ph.D. in Economics from the University of Illinois.
